EDUCATION

YALE SCHOOL OF MANAGEMENT
Master of Management Studies in Global Business and Society — **Expected Jun 2027**

- Management Science major (STEM)

UNIVERSITY OF BRITISH COLUMBIA
Master of Management — **May 2026**

DUKE UNIVERSITY
Bachelor of Economics; Political Economy, Emphasis in Economics — **May 2025**

- Duke GPA: 3.807/4.0 | Dean's List with Distinction: Fall 2023, Spring 2024

PROFESSIONAL EXPERIENCE

BYTEDANCE / TIKTOK SHOP — **Shanghai, China**
Strategy Operations Intern, Regional Analytics & Special Projects — **May-Aug 2025**

- Built the analytics and business case for automating Monetized Business Packages (MBP), supporting Data Science and Engineering investment; contributed to a 1.5pp increase in Southeast Asia MBP GMV penetration.
- Selected campaign KPIs and built 50+ Excel dashboards from scratch, analyzing approximately 200K cumulative seller, creator, product and campaign data points to identify performance gaps.
- Screened 5K+ sellers and creators across six Southeast Asian markets and coordinated with 30+ local-market contacts; targeted pools saw ad revenue/GMV rise 0.5-0.8pp and incremental ad revenue/incremental GMV rise 0.2-0.6pp.

DELOITTE CONSULTING — **Beijing, China**
Consulting Analyst Intern — **May-Jul 2024**

- Produced six data-visualization reports and supported the design of 30+ digital retail-platform pages in Axure, contributing to the implementation blueprint with the business-analysis team.
- Cleaned and analyzed 18K+ retail records using Python and Tableau, applying exploratory and predictive analysis to inform a building-materials client's two-year business outlook.

IQVIA — **Shanghai, China**
Analyst Intern — **Jun 2023-Apr 2024**

- Analyzed pricing and consumer-behavior information across 12 drugs and synthesized 10+ expert interviews, drawing on regulatory and clinical research to assess market and pricing strategies.

PROJECTS

DAYWEAVE — AI DAILY PLANNER — **Demo | Case study | GitHub**
Personal product project | React / TypeScript / Claude API (pre-generated) — **Oct 2026-Present**

- Owned product, UX and AI-assisted development of a bilingual planner demo with cited briefs, task breakdowns and natural-language scheduling proposals.
- Kept scheduling rule-based with evidence checks and explicit approval; tested 21 synthetic cases over three runs each. After a validator fix, the same outputs re-scored 61/63, with failures and fallback retained.

TOUTOULE — **Demo | GitHub**
Personal product project | Python / Pydantic / Streamlit — **Sep 2026-Present**

- Built and launched a job-triage tool for eligibility, deadline and application-cap checks; combined structured extraction, source-quote verification and deterministic screening rules with user approval before export.
- Iterated three times on the same 50 job postings against a same-model plain-prompt baseline; a fresh run reduced critical-field hallucinations from 20/249 to 8/249 (60%), with critical false negatives at 6/67.

ADDITIONAL INFORMATION

- Analytics: Python, SQL, R, Stata, Excel, Tableau
- Presentation and prototyping: PowerPoint, Think-cell, Axure
- Languages: Mandarin (native), English (fluent), Japanese (conversational)
